PROFILE

Motivated and focused to achieve excellence in projects, I am a Senior Web Developer looking for a new opportunity and challenge, to showcase and develop my skills, whilst contributing to new projects. I bring experience in various Content Management Systems, with high level usage of WordPress. I am proficient in site builders, such as Elementor and Oxygen, and also bring experience in SEO and on-page optimization. Server maintenance abilities, and expertise in Microsoft and Adobe packages, are also aspects of my profile. A desire to learn, to grow and to contribute is what drives me.

EXPERIENCE

2016 – Present
Senior Web Developer • Azzurro-Blu
Responsibilities include meetings with clients to discuss their requirements for their website, building wireframes before passing these on to the designers. I'm also responsible for maintaining the servers that our websites are hosted on, along with ensuring regular backups are taken and implementing updates and security patches to our portfolio of websites. On occasion I am also required to conduct keyword research and on-page optimisation of the client sites. I also deal with any problems our clients may be experiencing with their emails or website.

2016 – 2016
PFS Assistant • Tesco
Working as an assistant in the petrol station required me dealing with the public by helping them process transactions and help them with any issues or queries they had. I was also responsible for ensuring that people were using the petrol pumps in a safe manner.

2015 – 2016
Graduate Software Engineer • Capula
Working at Capula as a graduate software engineer, I have been able to find out what it is like to work in a company that works with various clients and working on a variety of projects, including drawing up wireframes for applications and working for Capula has allowed me to further develop my ability to work within a team, dealing with clients and working to deadlines.

2008 – 2015
Sales Assistant • Morrison's PLC
I worked as part of a team stacking shelves when the load was delivered in the morning until late in the afternoon, ensuring that the stock was made available for the customers. Part of my role involved me being in regular contact with the public and deal often with customer enquiries and occasional complaints. Being considered a senior member of the team, I was often given supervisory tasks which included stock control and waste management, as well as making sure that everyone had a job to do. During the holiday periods, the store would become extremely busy, and this helped to develop my ability to work under pressure.
